JAMIA HAMDARD UNANI MEDICINE CONFERENCE 2017

One Day National Conference

THEME: A MULTIDISCIPLINARY APPROACH TO DISEASE IN PRESENT HEALTH SCENARIO

23rd March, 2017

organized by:

SCHOOL OF UNANI MEDICINE
JAMIA HAMDARD, NEW DELHI-62

Venue:

CONVENTION CENTRE, JAMIA HAMDARD, NEW DELHI

Late Hkm. Abdul Hameed

Jamia Hamdard was conceived as a seat of higher learning in Unani Medicine and other areas of knowledge by its founder, Late Hkm. Abdul Hameed, and has been maintaining a steady progress in all facets in its existence of 27 years. The name Hamdard itself has become symbolic of Unani Medicine in India.

The School of Unani Medicine has a stamp of its Founder, Late Hkm. Abdul Hameed, one of the greatest Unani Physicians of 20th century, a Padma Shri and a Padma Bhushan, philanthropist, educationist, entrepreneur and great Institutional builder. The School of Unani Medicine aims at transformation and upgradation of Unani education and research in India through integrated approach by introduction of science and technology. We strive to be valued as institution leader in bringing the highest standards of Unani health care, education and research nationally and internationally and to tap the tremendous potential of Unani medicine as means of safe and effective health care and to provide solutions for various diseases and enhancing quality of life in a natural way.

The School of Unani Medicine, Jamia Hamdard, feels immense pleasure to announce a one day national conference **"A multidisciplinary approach to disease in present health scenario"** on 23rd March, 2017.

The theme of the conference "A multidisciplinary approach to disease in present health scenario" aims to facilitate the synergistic effort of multiple disciplines towards attaining optimal health for people. Today's health scenario demands a shift from unilateral conventional approach to a multidisciplinary one for disease prevention and management and the appeal of adjunctive therapies is on the rise. The primary goal of multidisciplinary approach is to provide the patient with a wide range of appropriate healthcare options. This type of fusion requires rigorous scientific exploration and an evaluation of advantages and justifications for this integrated approach. This conference aims to generate a platform in which academicians, physicians and researchers from different fields will present a joint debate on broadly defined medical disciplines in the country. It is a genuine effort to discuss the development of evidence-based integrative medical approach, the growing need of the hour towards a holistic approach. The debates would lead to a more positive rational of integrating the best of each medical discipline towards better, safe and cost effective clinical outcomes which focus on enhanced patient satisfaction and care.

This endeavour is looking forward to contributing to a possible platform for providing deep insight into various healthcare systems and knowledge exchange to bring together enhanced collaboration towards patient care.

The conference will focus on the following themes:

- *Immunomodulation and adjuvant therapies*
- *Lifestyle disorders*
- *Palliative and rehabilitative care*
- *Standardization and validation of Unani pharmacopeial drugs*
- *Standardisation and Validation of Ilaj bit Tadbeer (regimenal therapies)*
- *Skin Diseases and Cosmetology*
- *Neurological and Psychiatric Disorders*
- *Redesigning of dosage forms of compound Unani formulations*

The theme being multidisciplinary approach, the conference will have invited talks from eminent and distinguished speakers from various medical disciplines followed by panel discussions and ONLY scientific poster presentations from the participants.

Abstract Submission Guidelines

Abstracts for scientific poster presentation on any of the themes of the conference (not more than 400 words), is to be typed in MS word, Times New Roman, Font 12 and Space 1.5 and sent through email as an attachment to: **jhumedsum@gmail.com** on or before 15th March, 2017. The title should be mentioned at the top and should be clear and informative, containing key elements of the covered topic. Specify the theme area of the abstract. Provide names, job titles,
