Computer Mathematics

JAMIA HAMDARD

Contents

Foreword		iv
Unit 1	Sets, Relations and Functions	1
	The Concept of a Set	
	Notations and Representation of a Set	
	Types of Sets	
	Theorem on Subsets	
	Venn Diagram	
	Set Operations	
	De-Morgan's Laws	
	Applications of Venn Diagrams	
	Ordered Pairs, Relations & Functions	
Unit 2	Graph Theory	61
	Graphs	
	Applications of graph theory	
	Trees	
	Applications of trees	
Unit 3	Introduction To Recurrence Relations	145
	A sequence	
	Recurrence relation	
	Solving a recurrence relation	
	Characteristics equations	
Unit 4	Introduction To Propositional Calculus	165
	Logic	
	Conditional Propositions	
	Quantifiers	
	Applications of Logic	
Unit 5	Boolean Algebra & Its Applications	195
	Introduction	
	Boolean Expressions and Boolean Functions	
	Identities of Boolean Algebra	
	Duality
