

Bachelor of Computer Application

BCAD-204

Business Systems

JAMIA HAMDARD
(Deemed University)

Contents

		v
Foreword		
		1
Unit 1	Data Processing	
	Introduction	
	Concept, Relevance and Cycle	
	Organization and Attributes of Business Data Processing	
	Business Systems	
	Computing Environments	19
Unit 2	Programming Methodologies and Principles	
	Introduction	
	Programming Methodologies	
	Programming Principles	
	Object Oriented Programming Methodologies	
	Advantages of Object Oriented Programming	
	Characteristics of Object Oriented Languages	
	Applications of Object Oriented Programming	37
Unit 3	Input and Output Devices	
	Introduction	
	Input devices	
	Output devices	67
Unit 4	Physical Storage Devices	
	Physical Storage Devices	77
Unit 5	Files	
	Concept of Files	
	Data Structure	
	File Organizations	
	File Operations	
	File Processing Activities	
	Report Generation	
	Multiple File Handling	
Unit 6	Data Processing using FoxPro	103
	Introduction	
	Features of FoxPro	
	Starting and Quitting FoxPro	
	Creating and using Database	
	Sorting and Indexing Database	
	Performing Queries
