

**JAMIA HAMDARD
HAMDARD NAGAR, NEW DELHI**

Ref. No. JH/RO/OO/2024/29

Date: 11.07.2024

MCD Advisory

Measures for Prevention of spread of vector borne disease e.g. Malaria, Dengue & Chikungunya

All staff members and residents of the Jamia Hamdard & Pul Prehladpur Campus are hereby requested to follow the following preventive measures:

S. No.	DO's	DON'Ts
1	Cover all water tanks and containers with well fitted lids to prevent breeding of mosquitoes.	Do not keep water containers/tanks open as they can attract mosquitoes to breed.
2	Empty, scrubs and dry coolers every week before refilling to prevent breeding of mosquitoes. Paint inside of coolers before use in summer.	Do not use old grass of cooler in the next session and properly dispose-off the same.
3	All unused containers, junk materials, tyres, coconut shells etc. should be properly disposed off.	Do not throw broken utensils, unused bottles, tins, old tyres and other junks in open as mosquitoes breed in these objects during rainy season.
4	Change water of flower vases, plant pots, bird pots every week to prevent mosquito breeding.	Do not allow water to stagnate in and around houses in buckets, barrels, flower pots, bird baths, freeze trays, coconut shells etc.
5	Cover the toilet seat if going out of home for more than a week.	Do not depend only on platelet counts for diagnosis of Dengue.
6	To avoid mosquito bites, wear full-sleeved clothing and use mosquito repellents to prevent mosquito bites. Put wire mesh on doors and windows to prevent entry of mosquitoes.	Do not allow children to wear short sleeved clothes and play in water puddles and stagnant water bodies.
7	Use bed nets at home and hospital during Dengue fever to prevent mosquito bites and to interrupt transmission, use aerosol, vaporizers (Coils/mats) during day time.	Do not insist for hospitalization in case of Dengue fever unless advised by a Doctor as many Dengue patients do not require hospitalization.

11/7/2024

8	Take Paracetamol, plenty of fluids and rest in case of fever.	Do not use Aspirin, Ibuprofen, Nimusulide and over the counter medicines for lowering down body temperature.
9	Please create awareness among community and masses.	Do not create panic. Dengue & Chikungunya are self-limited diseases in most cases and Malaria is treatable.

The above advisory is issued in the larger public interest and to keep away from mosquitoes breeding.

The staff, residents or any person, if found negligent of the above measures may be called for strict action including fine of Rs. 1000.00 for households (under Malaria Bye-Laws framed by MCD).

A copy of Commissioner, MCD letter dated 28.03.2024 is enclosed for the information & adherence by all concerned.
