

## Pro-Vice Chancellor's Message

---

### **Dr. Ahmed Kamal**

*Ph.D, FNASc, FRSC*

Jamia Hamdard is amongst top 25 universities of India, taking education and learning to new heights. Join us to be a part of a unique teaching, learning and living experience as it is much different from many other educational institutions. Jamia Hamdard is a research based institution and offers professional courses to suit the demands of the employment avenues. We have exceptional and committed faculty, researchers and students who would like to make the world a better place to live.

The education at Jamia Hamdard is undergoing a futuristic transformation by incorporating our strategic vision for teaching and learning. We provide the holistic approach to education by preparing our students to grow in a dynamic global scenario. We inspire and motivate our students to be the best in their fields by rigorous learning and training processes. Our environment and culture enables to adapt innovative skills. International partnerships provide an excellent opportunity for the faculty and students not only to develop collaborations and networking but also position themselves appropriately to the teaching and learning demands of the global institutions.

Jamia Hamdard has always been in the forefront to not only provide the best facilities to its students from the academic perspective but also there are continuous efforts to facilitate their overall growth. Jamia Hamdard is strengthening its research capabilities as well as infrastructure. The outcome of research findings from this University have been quite notable particularly in the areas of Pharmacy, Medicine, Biotechnology, Chemistry and Toxicology, thereby finding its place in the world rankings. Many excellent research publications are being published from these disciplines that are being highly cited.

Various Schools of Jamia Hamdard organizes annual fests and invites students from various institutions and universities across the country which provides a platform for the students to share their innovative ideas and successes they have achieved.
