## OBJECTIVES

The pharmaceutical research has reached new heights due to the advent of computer aided drug design and discovery, nanotechnology, stem cell research, molecular diagnostics, translational medicine, reverse pharmacology etc. Advances in assay and instrument technology have provided the means necessary to address the evolving needs of drug discovery. In order to provide proper direction and to channelize future pharma research and keeping the recent developments in mind the seminar provides the right platform.

This seminar will provide a platform for interaction between young scholars and scientist from academia and industry with the experienced scientist from various institutions. Eminent research personalities have been enlisted as resource persons. The outcomes of the seminar will direct the future foci to move ahead in various research areas for the benefit of mankind.

The latest trends highlighting innovative and interesting topics will be discussed under the main theme of the conference. Participants will be engaged in such issues as the current and future status of drug design and synthesis, formulation development, biotechnology, herbal drug development and clinical pharmacy.
