Specification for Weighing Balance

- Maximum Capacity: 220g
- Weighing platform dimension: 90mm
- Readability: 0.1mg
- Setting time: 0.2 s
- Sensitivity temperature drift: 2 0ppm/°C
- Weight for balance: not more than 5.0kg
- Adjustment range with external weight: 100-200g
- Interface: RS 232
- Automatic internal Adjustment
- Level indicator should be in front of the balance
- Balance should overload protection
- Balance should have smart trac for showing how much weighing range has been used
- Balance should have solid metal base
- Applications: Formulation, totaling, dynamic weighing, piece counting, statistics, free factor
