## INTRODUCTION TO THE CONFERENCE

Drug regulation is a public policy response to the demands of public health and the changing needs of pharmaceutical industry. Thus, the objective of regulatory control is a question of achieving a 'balance' between protecting and promoting public health and facilitating the industry vis-à-vis compliance with regulatory standards. The conference is focused at bridging up the gap between the academia and industry through a well meaning brainstorming sessions which help build in the conference in both the end- users and manufacturers.
