**2nd March from 11 A.M to 12.30 P.M at  
SCLS Seminar Hall**

Dear All,  
Wishes of the Day!

HAH – Centre for Information Technology is organizing a Lecture cum Presentation on 2nd March from 11 A.M to 12.30 P.M at SCLS Seminar Hall on use cases of Artificial Intelligence in Higher Education Institutions with respect to teaching, research, innovation and employability. As we all know Artificial Intelligence is no longer an emerging subject; it is becoming the foundational layer across industries including healthcare, finance, manufacturing, logistics, retail, and education. The speaker Mr.Avinash Arora, CAIO M/S Orbit techsol is an industry veteran with proven track record. He is just in middle of establishing a Centre of Excellence in Artificial intelligence at IIT Delhi which Jamia Hamdard is also contemplating to replicate here for the students and faculty members. It will be a strategic initiative that can significantly elevate our academic positioning, strengthen not only the research ecosystem, but prepare students for the rapidly evolving industry landscape that AI is fast reshaping.

Hon'ble Vice-Chancellor is keen that faculty members, senior administrative officers of the University and research Scholars to attend the lecture, take part in deliberations around it and help evolve opinion on shape of Centre of Excellence in AI at Jamia Hamdard.
