## **HMS CENTRAL LIBRARY**

### **Brief Introduction**

The University Library, established in 1977 by the great visionary and late Chancellor Hakeem Abdul Hameed (1908–1999), is one of the oldest academic institutions of the University. In 1992, it was renamed the Hakeem Mohammed Said Central Library (HMSCL) in honor of the Founder's younger brother. HMSCL is committed to consolidating all university resources under a unified system, ensuring easy and seamless access for users. The library is fully automated with RFID technology, featuring self-service kiosks for convenient check-in and check-out.

The Jamia Hamdard Library System consists of the HMS Central Library and six school libraries: the Hamdard Institute of Legal Studies and Research (HILSR), the School of Chemical and Life Sciences (SCLS), the School of Interdisciplinary Sciences and Technology (SIST), the School of Nursing Science and Allied Health (SNSAH), the School of Pharmaceutical Education and Research (SPER), and the School of Unani Medical Education and Research (SUMER).

The Library houses approximately 1,90,000 volumes, including around 30,000 rare books. It also holds over 18,500 bound journal volumes and subscribes to a range of national and international journals, as well as select online databases. A standout feature of the library is its Manuscript Section, which contains over 3,500 manuscripts in Urdu, Arabic, and Persian.

Headed by the Hon. Vice-Chancellor, the LAC plays an important role in the policy decisions of the library. During 2024-25, two meetings of the LAC were held on September 10, 2024, and on January 24, 2025.

### **Services Offered**

The Library offers circulation and lending facilities, including a Book Bank and RFID-enabled self-checkout, to ensure easy access to learning materials. The Library subscribes to some of the finest resources in the world for the use of faculty members, research scholars, and students.

The Library has been providing research support services to the faculty and research scholars of the university. In August 2024, Jamia Hamdard created a digital archive on the DSpace platform to preserve its publications. The digitization and uploading of previous years' question papers to the Jamia Hamdard Institutional Repository (<https://repository.jamiahamdard.edu/home>) were successfully completed during the year.

Other collections include books published by Jamia Hamdard, Ph.D. theses, convocation speeches, rare newspapers and magazines, and Jamia Hamdard newsletter, *Spreadsheet*.

In addition to this, first few pages of 2200 out of 3500 manuscripts, were made accessible on <https://repository.jamiahamdard.edu/home> during the year under review.

During the year, to significantly augment digital resource accessibility, remote access facility was provided to the library users.

For easy access to Library resources, a new Library Website has been designed and created by the library staff without any financial implication or outside technical support. The site may be accessed at <https://library.jamiahamdard.ac.in>

**Dean: Prof. Farhan Jalees Ahmad**

## **1) Brief description of the School:**

The School of Pharmaceutical Education & Research is one of the most prestigious institutions of Pharmacy Education in India, has been ranked as No.1 among Pharmacy in National Institutional Ranking Framework (NIRF) in the years 2017, 2019, 2020, 2021, 2022, 2024, 2025 and Ranked as No. 2 in 2018 & 2023 by the Ministry of Education, Govt. of India, among the Pharmacy Institutions of India. Established in the year 1972 as Hamdard College of Pharmacy, affiliated to the University of Delhi with D. Pharm. and B. Pharm., and in 1982 upgraded to M Pharm and Doctorate programs and named as Faculty of Pharmacy with the establishment of Jamia Hamdard in 1989, presently known as School of Pharmaceutical Education & Research (SPER). The school is approved and recognised by the Pharmacy Council of India (PCI).

The School offers Undergraduate (D. Pharm. and B. Pharm.), Postgraduate, and Doctoral programs in Pharmaceutics, Pharmaceutical Chemistry, Pharmacology, Pharmacognosy, Quality Assurance, Pharmaceutical Analysis, Pharmacy Practice, and Pharmaceutical Biotechnology. In addition, offers a PhD in Pharmaceutical Medicine, a unique, first-in-country collaborative program run in collaboration with Sun Pharmaceutical Industries Ltd. The school at present enrolls more than 1000 students.

The School has a well-established central instrumentation facility (CIF) with modern, sophisticated instruments, including a cryogenic Transmission electron microscope (TEM), LC-MS, NMR, HPLC, HPTLC, DSC, UV-Vis spectrophotometer, FT-IR, and AFM. Facilities for interdisciplinary research, including flow cytometry, confocal microscopy, western blot analysis, electrophoresis, wet lab synthesis, Microwave-assisted organic synthesis (MAOS), cell line studies, and other cutting-edge techniques, are also available.

The School is active in organizing national/international conferences, seminars, symposia, faculty development programs, and workshops that cover all facets of pharmaceutical sciences, thereby offering holistic development to our students and faculty. The e-PG Pathshala (an initiative of the MHRD under its National Mission on Education through ICT (NME-ICT), executed by the UGC) modules have been prepared by the faculty of SPER to provide high-quality, curriculum-based, interactive e-content across various subject areas of Pharmaceutical Sciences.

The School has collaborations with both academic and research institutions. Industry-sponsored projects are also being executed for companies such as Sun Pharma, Dabur Research Foundation, Jubilant Life Sciences, AIMIL Pharmaceuticals, Dolphin International, Fermish Clinical Technology, GBC, Beijing, China, and Ultimex Health, USA.

All Departments are currently receiving support under the DST-FIST program and the Special Assistance Program (SAP) of the University Grants Commission (UGC) at the DRS Phase I and Phase II levels. Research activities across all SPER departments are well-funded. In the last 5 years, the departments have received research grants from various funding agencies, including CSIR, DST, ICMR, UGC, AICTE, DRDO, BIRAC, DBT, CCRAS, and CCRUM.

Thrust areas of research include: Drug targeting through nanomedicine, Herbal drug technology and standardization, Metabolomics, Computer-aided drug design, Design and synthesis of new chemical entities & natural product chemistry, Design and synthesis of antidiabetic and anticancer agents, Neuropharmacology and Cardiovascular pharmacology.

# **SCHOOL OF ENGINEERING SCIENCES & TECHNOLOGY (SEST)**

**(April 1, 2024 to March 31, 2025)**

**Dean: Prof. Farheen Siddiqui**

## **1) Brief description of the School:**

The Department of Computer Science & Engineering in the School of Engineering Sciences & Technology started in 1997, and it has grown now into a vibrant center of teaching and research. The Department not only offers Under Graduate (UG) and Post Graduate (PG) Programmes in Computer Science & Engineering/ Computer Application / IT / ECE / Data Science/ Cyber Forensics & Information Security but is also engaged in high-quality research activities leading to Ph.D. degree in different thrust areas of computer science and engineering and interdisciplinary areas viz. Big Data, Soft Computing, IoT, Neural Network, Artificial Intelligence, Fuzzy Logic, Software Engineering, Data Mining, Information Security, Cyber laws, Cyber Forensics, Computer Architecture, Graph Theory, Computer Networks, Distributed System, Discrete Structure, Robotics, Machine Intelligence, Telecommunication, Mobile Computing, DBMS, Algorithms, VLSI Design etc. to list a few. Department has made a lot of contributions towards these areas in the form of publications in journals/conference-proceedings/books/sponsored research and collaboration with the industry.

The Department has a huge infrastructure to provide facilities to our students. The department has several smart cluster rooms fully equipped with state of art of technology. It also has 2 computer labs with the latest PCs having an i5 processor with 8 GB RAM and 1 TB storage. The computer lab is fully equipped with the latest Open Source Software as per our curriculum requirement running on Ubuntu OS. Several PC's in Computer Lab at 1st floor runs on Windows OS having required software for academics. The Department also has a Research Lab (2nd Floor, Department of CSE) for our Ph.D. students. These labs are fully equipped with Air Conditioning and CCTV cameras have been installed too. The Department has 1 Conference Room with a seating capacity of more than 100 for conducting departmental meetings and student seminars. In ECE domain, we have basic and advanced Electronics & Communication Labs according to the required curriculum. These labs include Analog & Digital Labs, Embedded Systems Lab, FPGA Development kits, DSP Lab, Satellite & Microwave Lab, Digital Design Lab etc. The ECE labs have software as per the academic curriculum and these labs are equipped with updated and advanced instruments. The department also has high-end computing and Artificial Intelligence Lab. Recently the Ministry of Telecommunications, Government of India has awarded 5G Use case Lab to Jamia Hamdard which is among four in NCR Region. The students are provided internships and trainings via the MoU's signed with several setups like the AICTE's Internshala Scheme, Co-Cubes and RnF (for Campus placements), and ETrain India Pvt. Ltd for conducting seminars/workshops which are Microsoft/Adobe certified. These certifications open an arena of opportunities which are unmatched for. The campus placements (On-site or Off-site) have big giants in the industry like TCS, Wipro, HCL, Fiserv, RnF, and Ericsson to name a few which recruit students and they prove to be assets to the industry. Student chapters of International Professional bodies like IEEE, and National like CSI, ISTE, and IETE are to the credit of the Department. These open avenues are wide and enable students to enhance their technical skills. These also help the students to showcase their talent with several nontechnical events organized from time to time. Besides exemplary academic record our department also has an MoU with Reaching Sky Foundation (an NGO) which targets the social causes and perform several programs that fall under Unnat Bharat, Govt. of India, scheme. The department has a pool of highly qualified teachers and technical staff members as per UGC/AICTE norms.

Several teachers of the department have been awarded/granted National and International patents. The vibrancy of research programs at the department is accentuated by the high – quality publications including books, book chapters, scientific papers and research articles in highly reputed indexed journals with indexing

services like SCI, SCIE, SCOPUS and Springer. In addition, Research projects from several govt. agencies like UGC, DST, DBT, DIT, AICTE are to the credit of the faculty members.

The department also has an Entrepreneurship cell (E-cell) which motivates the students to think about innovations in day-to-day life. To sensitize students of the department about societal issues related to women, it has an active Women-cell which conducts activities related to women and girl students. An Institution Innovation cell approved by the MHRD's Innovation Cell, Govt. of India has been bestowed upon to the institution. The Department has been recognized by the Department of Science and Technology with a grant approved under the FIST scheme. Another milestone achieved by department is the approval of several Full-time and Part-Time seats by the Ministry of Electronics and Information Technology under the Visvesvaraya PhD Scheme of MeitY, Govt. of India. Financial support in the form of fellowship, RoR, institutional overhead and research contingency is provided.
